Re: District 12 STEMI protocol revision and update

To All VT EMS District 12 providers:

Since “going live” with our regional STEMI protocol this past spring, we have identified a few areas of concern and confusion. I have worked on getting input from our ED physicians as well as our District board regarding how we can improve on our first version. Please see attached to this letter version 2 of our regional District 12 STEMI protocol. The general plan of care for STEMI patients has not changed but you will see subtle wording changes as an attempt to make the protocol clearer from a procedural and communications standpoint.

Please replace this version with any older versions which you may have. As always, comments and input always appreciated.

Thanks,

Daniel Perregaux, MD FACEP
